TITLE	National Diffusion Network Materials Inventory. Materials Available for Programs Approved by the Joint Dissemination Review Panel, Department of Education. Fourth Edition.
INSTITUTION	Far West Lab. for Educational Research and Development, San Francisco, Calif.
SPONS AGENCY	Department of Education, Washington, D.C.
PUB DATE	80
CONTRACT	300-80-0839
NOTE	795p.: For related documents, see ED 149 439 and ED 162 419.
EDRS PRICE	MF05/PC32 Plus Postage.
DESCRIPTORS	*Audiovisual Aids: Cost Estimates; *Demonstration Programs: Educational Equipment: Elementary Secondary Education: *Instructional Materials; *Resource Materials: Validated Programs
IDENTIFIERS	National Diffusion Network Programs

ABSTRACT

This catalog lists materials and equipment used to implement programs approved by the Joint Dissemination Review Panel (JDRP), and is meant to be used in conjunction with the National Diffusion Network's annual publication, Educational Programs That Work. Program entries are listed in alphabetical order by project title: the list of available materials for each includes the name of the material, its use, and the degree to which it is needed, as well as its cost, distributor, year of publication, and copyright status. The names, addresses, and telephone numbers of project administrators in charge of materials are given. The catalog also includes an audiovisual materials inventory, i.e., a list of projects that have audiovisual aids. (FM)

K.W. Harms

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)."

IR009133

This publication has been produced with support from a subcontract funded under contract #300-80-0839 with the Department of Education. The contents of this publication do not necesarily reflect the views or policies of the Department of Education or the Far West Laboratory for Educational Research and Development, nor does mention of trade names, commercial products, or organizations imply endorsement by the U.S. Government or the Laboratory.

INTRODUCTION

The Materials Inventory is a list of materials and equipment used to put programs approved by the Joint Dissemination Review Panel into operation at adopting sites. Only those programs that have materials to share are listed. This publication is meant to be used in conjunction with the NDN's annual catalog, Educational Programs That Work.

The program entries, listed in alphabetical order by program name, are followed by an index in the same order. As new programs are approved by the JDRP, their lists of materials can be inserted in alphabetical order.

The entries are not necessarily comprehensive lists of all materials used by each JDRP-approved program; some may give only an idea of the types of materials used and the possible costs that may be incurred when planning a full adoption. Prices are subject to change, and, for some programs, other materials can be substituted for the ones that are listed. Users are cautioned to check with the contact person listed on each entry before purchasing any material.

PROJECT FREESTYLE

descriptors

Career Education, Family Life Education, Mass Media, Secondary Education, Sex Stereotypes

target audience

Approved by JDRP for children ages 9-12 and their parents.

description

A series of television programs aimed at reducing sex-role stereotypes and expanding career awareness for children ages 9-12 and their parents.

Freestyle seeks to develop more positive attitudes toward both males and females engaging in activities and occupations that traditionally have been seen as appropriate for only one sex or the other; to promote the belief that males and females have more abilities and engage in more varied activities and occupations than the prevailing stereotypes suggest; and to increase each child's interest in childhood activities and adult occupations that traditionally have been the domain of the opposite sex.

Freestyle television programs are centered around three content areas: child pre-occupational activities (activities that may lead to specific career interests); childhood behavioral skills (skills that children can begin to develop that may be useful in educational progress and in careers); and adult work and family roles.

The series consists of 13 half-hour dramas divided into 26 15-minute segments for classroom use. It is also available as undivided half-hour programs for home viewing. The programs portray a multiethnic group of young teenagers and their families. As the teenagers engage in nonstereotypical interests and activities, they model behavior strategies needed for successful achievement in school and in work. Viewers learn about the changing roles of men and women in the occupational world and in family living through the setting and the plots of the dramas.

Freestyle can form the basis for a new emphasis in career education programs or may be integrated into the regular language arts and social science program in the middle grades and in junior high schools. It is useful in the implementation of Title IX and in sex equity programs for teachers, administrators, parents, and community groups. The publication, Curriculum for the Television Career Awareness Project FREESTYLE, contains materials that can be copied for classroom use and information to support curriculum development, staff training, and parent education in career awareness and sex equity programs. The publication, FREESTYLE Guide, suggests classroom activities to extend each of the Freestyle television programs along with ways to infuse the program into other subject areas in the regular curriculum.

evidence of effectiveness

Project-developed pre- and posttests of 7,000 children in seven different cities showed a significant reduction in stereotypic beliefs and attitudes among children exposed to the Freestyle programs and discussions as compared to children in control groups.

implementation requirements

Designed for use in intermediate grades, the curriculum can be implemented by a single teacher, a school, or a district. It can be integrated into the regular curriculum using the suggestions in from the FREESTYLE Guide, or it can be used as the basis of a new course of study.

financial requirements

Adopter needs one set of 13 Freestyle videocassettes ($455) and teacher's manual for each teacher ($1; materials may be reproduced locally). Other instructional materials: Freestyle curriculum ($3.50), teacher resource packet ($2.50), self-instructional minimodules for adopting teachers ($3.50). Inservice requires one-half day released time for participating teachers plus trainer's travel and per diem. For districts conducting their own inservice, project-developed Staff Development Inservice Program kit ($2.50) and Leader's Handbook ($50) are available.

services available

No special network funding supports this project's dissemination efforts.

Awareness materials are available. Visitors are welcome at project site by appointment. Project staff are available to attend out-of-state awareness meetings (expenses must be paid). Training is provided at project site (adopter must assume all expenses). Training is also conducted at adopter site (expenses must be paid). All materials available upon request at reproduction and shipping costs.

Compiled Fall 1980

PROJECT RELIGION IN HUMAN CULTURE (RIHC)

descriptors Humanities, Religion, Secondary Education, Social Studies

target audience Approved by JDRP for students of all abilities, grades 9-12.

description

A complete program on the major religious traditions of the world for social studies classes, grades 9-12.

Religion in Human Culture (RIHC) is a semester-length, elective social studies course about religion for high school students. It consists of six instructional units which may be implemented wholly or in part; these include a unit on religious expression and five separate units on the Hindu, Buddhist, Judaic, Christian, and Islamic traditions. RIHC is a program for learning about religions and does not advocate any particular tradition. It is intended to help students acquire greater awareness, understanding, and appreciation for religious diversity and the legitimacy of the various expressions and beliefs. The curriculum content is consistent with United States Supreme Court decisions that public schools shall neither teach nor practice religion but may teach about religion as it affects human history and culture. The overall objectives for the Religion in Human Culture series fall within four categories established by the National Council for the Social Studies Curriculum Guidelines.

Religion in Human Culture exposes students to religious diversity; provides a way to look at religion without making value judgements; develops attitudes of understanding and respect for the beliefs and practices of others; centers on the study of religions as part of the social studies curriculum; furnishes a total teaching package about the major religions of the world; follows an easy-to-use, lesson-by-lesson format; emphasizes inquiry strategies, a developmental process, and substantive content; and presents each tradition from the adherents' point of view.

evidence of effectiveness In comparison with control groups, students enrolled in Religion in Human Culture showed substantial cognitive gains based on pre/posttest scores from a project-developed test collected during 1977-78 and 1978-79 in urban, suburban, and rural communities. Evaluation data are available.

implementation requirements Acquisition of the RIHC materials and their use in a high school classroom for one semester, implementation/teacher training workshop of one to three days, depending on adopter needs, and implementation monitoring or follow-up for one year are required.

financial requirements Complete set of materials for all six curriculum units, $320. For each unit there is a teacher guide, a student reader, filmstrips and guides, cassettes, and blackline masters. Additional student readers for each unit, approximately $2.50. Individual units may be purchased separately. Individual items from each unit may also be purchased separately. Travel and per diem for teacher training are negotiable.

services available An NDN-funded Developer/Demonstrator project.

Awareness materials are available at no cost. Visitors are welcome at project site by appointment. Project staff are available to attend out-of-state awareness meetings (costs to be negotiated). Training is provided at project site (adopter pays only its own costs). Training is also conducted at adopter sites (costs to be negotiated).

Compiled Summer 1980

PROJECT LAW EDUCATION GOALS AND LEARNINGS (LEGAL)

descriptors Legal Education, Problem Solving, School Community Programs, Secondary Education, Social Studies Values

target audience Approved by JDRP for secondary level students, grades 7-12.

description

Using the LEGAL curriculum program, students have the opportunity to become more knowledgeable about the legal system and to apply their knowledge in problem-solving situations. The program enables students to develop decision-making strategies while utilizing behaviors compatible with the legal codes of contemporary society.

The LEGAL program includes components for student instruction and teacher inservice training. Project materials provide guidelines for community research and support for a wide range of classroom instructional activities. For grades 7-9 (the LEGAL Jr. program), the curriculum materials consist of two detailed instructional guides (Criminal Justice and Consumer Law); a workbook (in student and teacher editions) containing 10 field experiences and 10 alternative classroom activities (with five sound filmstrips); teacher implementation and resource guides; program assessment instruments; and a support manual for managers (with administrative guidelines) to aid in program implementation. For grades 10-12 (the LEGAL Sr. program), the curriculum materials consist of two detailed instructional guides (American Justice System and Community Law); a workbook (in student and teacher editions) containing four law resource units; a workbook for students that contains guidelines for the community law research project (with three sound filmstrips); teacher implementation and resource guides; program assessment instruments; and a support manual for managers (with administrative guidelines).

LEGAL inservice training for teachers provides a means through which appropriate instructional strategies can be developed, community resources can be identified, and program implementation procedures can be facilitated.

evidence of effectiveness Junior and senior high school students participating in the LEGAL field study programs significantly out-performed their respective control groups (.001 level) on an objective-referenced, summative assessment instrument with criterion levels of mastery set for each objective. The instrument was developed by the project and validated by an independent audit team.

implementation requirements A variety of options are available to adopting districts. A district may adopt the LEGAL program on the junior high and/or the high school level. The program at each level may be implemented as a semester or a full year course of study, or LEGAL curriculum units may be incorporated into existing courses. Those implementing the program should participate in a two day training session or review the self-instructional module that has been prepared for teachers. Each teacher will need a complete class set of LEGAL curriculum products designed for his or her grade level.

financial requirements The total start-up costs for the LEGAL Jr. program are approximately $235. Replacement costs for consumables are $2.50 per workbook. The total start-up costs for the LEGAL Sr. program are approximately $285. Replacement costs for consumables are $3 per workbook and $2 for each Community Source Book. The cost of teacher training will vary depending upon the ability of an adopter district to provide time and personnel for training.

services available No special network funding supports this project's dissemination efforts.

Awareness materials including program brochures and sampler kits on the junior high school and high school levels are available at no cost. Visitors are welcome at project site and demonstration schools by appointment. Project staff are available to attend out of state awareness meetings (expenses must be paid). Training is provided at either the project site or adopter site (expenses may shared). Follow-up technical assistance and monitoring are available (expenses must be paid).

PROJECT CASHFLOW FORECASTING SYSTEM

descriptors

Data Processing, Financial Services, Investment, Money Management, School Accounting

target audience

Approved by JDRP for school administrators and accountants who make investment or loan decisions.

description

A computerized method of forecasting cashflow for use in making investment and loan decisions.

This system was installed to assist in the making of investment and loan decisions and, specifically, to produce at least an eight percent increase in general fund interest earnings for the Jefferson County school district. The system provides the ability to enter forecasted and actual data for four different funds and then to project the cash balance for each day of a fiscal year. The data are revised to reflect actual transactions, and the projected cashflow balance is automatically recalculated for each day remaining in the fiscal year.

Since it was put into operation in April 1979, the system has proved to be far more effective than the informal, manual system it replaced. Financial management can now be based on the most complete and up-to-date information possible, with the data available almost instantly.

A computer terminal and a computer system that supports terminal operations and provides disk availability are used. The programming language is BASIC because this is the language normally used to teach computer programming to students. The Jefferson County school district already had a BASIC instructional program, so the necessary hardware and software were available for the Cashflow Forecasting System at no additional cost.

The system provides the ability to process four separate funds. The types of financial data processed include loans and investments, payroll deductions, bond payments, and four optional revenue and three optional expense categories.

evidence of effectiveness

A comparison of the district's interest income for the period of April through November 1979 with the same period in 1978, when manual forecasting methods were used, shows that the system has more than met the goal set for it. After adjustments for a lower revenue and higher interest rates in 1979, records show a net gain in interest earnings of $82,243, or 14 percent.

implementation requirements

A computer terminal with an 80 position print-line and a computer system that will support terminal operations and provide disk availability are required. This equipment and other required materials, such as data input forms, are either widely available or can be created in-house. The system relies on standard items of revenue and expense information routinely collected by school districts under normal operating circumstances. The BASIC programming language used is for the Honeywell 66 computer series. The input/output instructions will probably require modifications for use on computer systems of other manufacturers. The maximum program size is 28K words (56K bytes).

financial requirements

Estimated annual costs at project site are $4,700 for personnel and materials. Costs of computer use will vary, depending on whether facilities are already available in the adopting district.

services available

No special funding supports this project's dissemination efforts.

Awareness materials are available at no cost. Visitors are welcome by appointment. Project staff are available to attend out-of-state awareness meetings on a limited basis, with the recipient state paying all travel expenses. Training services are available at project site with adopter assuming own costs. Telephone consultation is available upon request. On-site follow-up by project staff is not available.

Compiled Fall 1980

PROJECT POSITIVE ATTITUDE TOWARD LEARNING (PATL)

descriptors Affective Behavior, Elementary Education, Kindergarten, Performance Based Education, Self Concept, Secondary Education, Teacher Education

target audience Approved by JDRP for K-12 students with a less-than-positive view of self and/or learning.

description *A performance-based inservice training program designed to improve student attitudes toward school by strengthening the consistency of teacher behavior.*

Improvement in a student's attitude toward school, self, and others leads to improvement in his/her rate of cognitive growth. Staff development is accomplished through the use of self-paced, individualized, performance-based learning packages called kits.

The teacher training kits teach specific skills in four complementary areas: active involvement, learning processes, individualized instruction, and improved communication and management.

Each of the training kits is designed to provide teachers with performance-based objectives, numerous learning activities designed to assist them in reaching those objectives, and criterion-referenced assessment procedures. Whenever possible, the learning activities provide the teacher with a choice of various media, small-group or individual sessions, and tapes or live observation. Feedback to the teacher is an essential component of the program.

Kit Advisors, a minimum of two per building, are trained to assist teachers working through the kits. Kit completion requires 20 hours of teacher time over a three- or four-month period. Completion of all four kits requires one and one-half to two years.

evidence of effectiveness Pre/post Coopersmith Self-Concept Inventory: target students improved from the 15th to the 40th percentile. Pre/post Gates-MacGinitie Reading Comprehension Tests: target students improved from .71 year of growth per year to 1.4 years per year.

implementation requirements Four days of training for persons selected as inservice specialists or Kit Advisors. Each Kit Advisor can then work with 7-10 fellow teachers, if they can be released from approximately 10% of their duties.

financial requirements Start-up cost is $500, plus $10 for each teacher to be trained. Operational costs consist of stipends for inservice specialists.

services available An NDN-funded Developer/Demonstrator project.

Awareness materials are available at no charge. Visitors are welcome by appointment every second week of the month. Training is conducted at the project site (adopting site pays only its own costs). Training is conducted out of state (exemplary project staff costs must be paid). Project staff may be able to attend out-of-state conferences (expenses must be paid).

Compiled Summer 1980

PROJECT

THE PROCESS OF TEACHING BASIC READING SKILLS IN SECONDARY SCHOOLS

descriptors

Class Management, Reading, Secondary Education, Teacher Education

target audience

Approved by JDRP for teachers in secondary schools, grades 7-12, and apprentices from teacher centers, regional educational labs, and state departments of education. Developed for use by teachers of students needing basic reading skills, this program has been used by teachers, program developers, and administrators, but no evidence of effectiveness has been submitted to or approved by the Panel.

description

A program providing inservice workshops to help secondary teachers manage class time and student behavior in basic reading classes.

Research findings gathered from secondary classrooms where basic reading was being taught were used to identify processes specifically related to reading gain. Positively related processes were found to include: discussion of homework or the reading content, instruction in new work, drill and practice, reading aloud by students, instruction focused on a small group or the total group, praise and support, positive corrective feedback provided by rephrasing the question or probing, and short quizzes. Negatively related processes include: teacher time spent on organizational or management tasks, outside intrusions (loudspeakers and so forth), social interactions, misbehavior or negative interactions, too much choice for students, too much time spent on written assignments, too much silent reading, and too much time spent with single students.

Based on these findings, the project developed seven 2-1/2 hour teacher workshops. The first presents an overview of the research findings, which are interpreted for their relevance to teaching basic reading skills. In the second workshop, teachers are given individual profiles, prepared from observations conducted in their classrooms, together with recommendations for changes in their teaching behavior. The third workshop provides recommendations for student motivation and behavior management. The fourth workshop is focused on ways of organizing or structuring classroom activities and on efficient management of time. The fifth workshop deals with question-asking techniques and with supportive and corrective feedback; diagnostic tests for use by classroom teachers and appropriate reading materials are also shared. At semester's end, teacher observations are conducted to determine whether recommendations have been followed. New profiles are prepared so that changes in teacher behavior may be examined at the sixth and seventh workshops, which follow. Recommendations are given to each teacher. Workshop sessions are conducted one week apart, generally between 3:30 and 6:00 p.m. Groups are limited to six. Although materials are used in the workshops, the cornerstone of the process is the encouragement and support given to teachers to try new ideas. Every teacher operates in a unique situation, and class size, room assignment, and school policies will determine how he or she can respond to recommendations.

evidence of effectiveness

Remedial reading students of teachers receiving the training gained 50.4 standard score points on the Comprehensive Test of Basic Skills, equivalent to a gain of 1.8 years. Teachers in the treatment group changed their classroom instructional processes in the ways recommended.

implementation requirements

Teachers attend seven 2-1/2 hour workshops, held after school hours. They are observed in the fall, winter, and spring. They are given recommendations for behavior change based on these observations. They are expected to try to make the recommended changes. Apprentices are expected to observe and participate in workshop sessions; they also learn to conduct observations. Subsequently, apprentices conduct workshops and train observers and other apprentices at their own sites.

financial requirements

Costs vary with the number of teachers, observers, and apprentices trained. Costs of training at the project site include project staff time and adopter staff time, per diem, and travel.

services available

An NDN-funded Developer/Demonstrator project.

Awareness materials are available at no cost. Project staff are available to attend out-of-state awareness meetings (expenses must be paid). Training is provided at project site (adopter must assume all expenses). Training is also conducted at adopter site (adopter must assume all expenses). Follow-up technical assistance and evaluation service are available to adopters (expenses must be paid).

PROJECT APEC: America's Possible Energy Choices

descriptors

Environmental Education, Science Education, Secondary Education, Social Studies, Teacher Education

target audience

Approved by JDRP for secondary science and social studies teachers and students, grades 9-12.

description

A program of energy education, with training for secondary science and social studies teachers and materials and study units for students.

The purpose of this program is to help students become informed about the varied and controversial energy choices facing the nation, from both a technical and a social point of view. APEC is an interdisciplinary course designed to be taught over a three- to six-week period as part of the regular science or social studies curriculum by the regular classroom teacher. The course consists of 32 half-hour lessons, which cover the following topics: demands for energy, existing energy sources, future energy sources, atomic theory and radiation, nuclear materials and energy plants, energy conservation, and nuclear safety.

A wide variety of materials are used to generate and maintain student interest. The course kit contains the following items: color transparencies, color slides, a narrated color filmstrip, audiotapes on the pros and cons of nuclear energy, teacher lectures, spirit masters of worksheets and quizzes, a bibliography of appropriate energy films, a paperback book for students on energy options, and suggestions for field trips and report and discussion topics.

Teachers complete a 10-hour training program which includes background lectures on the energy situation and specific instructions for teaching each lesson. Project staff keep informed of developments in the energy field by attending national and state energy conferences and by conducting their own library research. They review course lesson plans and materials each spring and revise them as necessary. Teachers who have completed the training program are kept informed by the project's bimonthly newsletter and also receive revised materials from the project.

evidence of effectiveness

APEC students have increased their understanding of energy (as measured by the Cognitive Test of Energy Development, a criterion-referenced test developed by the project) by a statistically significant level when compared to control groups.

implementation requirements

The course may be taught as part of the regular curriculum by the regular science or social studies teacher. Teachers must complete a 10-hour training program in two sessions. An average-size classroom or meeting room is required.

financial requirements

Costs for the start-up year are estimated at $657 for a classroom of 30 students and one teacher; kit materials are sufficient for that teacher to be able to serve five classes of 30 students each. Costs for subsequent years are estimated at $30 per year. Expenditures are for a complete instructional kit, consumables, and training.

services available

No special network funding supports this project's dissemination efforts. Awareness materials are available at no cost. Visitors are welcome at project site by appointment. Project staff are available to attend awareness sessions and to provide training out of state as their schedule permits (expenses must be paid). Project prefers to train several adopters at once at a location central to adopters. Follow-up by telephone and a bimonthly newsletter are available.

Compiled Fall 1980

PROJECT PROVISO READING MODEL

descriptors Communication Skills, Remedial Reading, Secondary Education

target audience Approved by JDRP for grades 9-12.

description *A program of structured sequential activities for language arts, mathematics, and science courses to remedy serious reading problems among students in grades 9-12.*

The Proviso Reading Model is a four-year program. Ninth-grade students identified as disabled readers enroll in the program's Level I courses in English, general science, and math fundamentals. In tenth, eleventh, and twelfth grades, students who have not yet developed the skills required to enter one of the district's nonremedial English curricular sequences are enrolled in program courses for Levels II, III, and IV.

The Proviso Reading Model is based on four convictions: that poor readers can improve, even at the high school level, if the building of reading skills is a major thrust of the total curriculum; that a sound reading-skills program at the high school level must be based on a definition of reading as a thinking skill; that the skills that make up what is generally defined as reading (linear reading) may better be learned through carefully devised visual literacy (media reading), composition, oral communication, mathematical computation, language, and listening activities within courses in English, science, and mathematics than in pull-out tutorial or remedial activities not part of the school's regular curricular offerings that may be viewed as extras of frills; and that materials and teaching strategies attractive enough to make reluctant students become excited about learning do exist.

The organization of the Level I instructional program allows for a variety of teaching strategies. Learning activities can be directed by a single teacher with a general background in language, composition, and reading. If the number of students enrolled in the program is large enough, the course can be taught by a team of three teachers, each of whom directs the activities of one specific area -- reading, media, or composition. Math and science are taught by regular classroom teachers using materials devised by district reading specialists. In Levels II, III, and IV, students continue to develop linear and visual reading skills while applying these to the development of skills in composition, speech, and media. A curriculum guide, with single copies of all instructional materials developed by the project, is available for each level.

evidence of effectiveness Three levels of the Stanford Achievement (Reading) Test were used as pre- and posttests. The average growth in reading skills demonstrated over a seven-month period by project students in grades 9-12 significantly exceeds the average growth demonstrated by the test's national norming sample of students with equivalent beginning status.

implementation requirements No facilities beyond those found in most secondary schools are required. Active administrative support is needed. Staff members should have academic backgrounds in oral and written composition and literature and an interest in the use of nonprint and print media as teaching devices. Those who lack this academic background should demonstrate concern and interest in the teaching of reading. Staff must be willing to use highly structured sequential materials.

financial requirements Per-pupil costs for adoption -- including training, equipment and materials, and consumables -- are approximately $95 for one class of Level I English, $52 for one class of Level I math, $114 for one class of Level I science, $97 for one class of Level II English, $73 for one class of Level III English, and $94 for one class of Level IV English. Per-pupil costs decrease with the addition of classroom sections of each component of the model.

services available No special network funding supports this project's dissemination efforts. Awareness materials are available at cost. Potential adopters may visit the project site by appointment. Training and implementation services are available to adopters only at project site (adopter pays only its own costs).

PROJECT THE TEACHING RESEARCH INFANT AND CHILD CENTER CLASSROOM FOR MODERATELY AND SEVERELY HANDICAPPED CHILDREN

descriptors Cerebral Palsy, Children, Home Instruction, Multiply Handicapped, Self Care Skills, Special Education, Volunteers

target audience Approved by JDRP for moderately to severely handicapped children, ages 1-8, including mentally retarded, cerebral palsied, autistic, emotionally disturbed, deaf/blind, and hearing impaired.

description *An individualized skills instruction program for moderately to severely handicapped children.*

Children are pretested on skills selected from the Teaching Research Curriculum for Moderately and Severely Handicapped. Pretest results are used to determine which skills will be taught. The deficit skills are prioritized by the parent and educational staff. After priorities are established, the child is placed in one or more of the four curricular areas -- self-help, motor, language, and cognitive.

Individual instructional programs are prepared for each child. A program prescribes the skill to be taught, the way in which the materials are to be presented, and the feedback to be given to the child. Trained volunteers play an important role in this model. They are taught how to deliver cues and feedback and how to record the child's appropriate and inappropriate responses to instruction. Maintenance of volunteer skills is objectively monitored by the teacher. Volunteers implement the instructional programs with each child and record child performance data in a specified manner. If the volunteer indicates through recorded data or verbally during classroom instruction that the child is having difficulty learning a particular program, the teacher provides instruction for the child. The teacher uses the daily data to make teaching decisions concerning individual programs for the following day and to ascertain whether sequencing, cue presentation, or feedback need to be altered.

When group instruction occurs, the teacher interacts with each child according to his/her individual instructional program. In this model, group instruction is provided only by the teacher or aide. Some instructional programs are selected by parent and teacher to be taught in the home, and these are coordinated with programs in the school. Teaching periods in the home vary from 10 to 30 minutes. Approximately 85% of the parents of project children participate in home instruction. All parents participate in the program planning conferences for their child.

(The Teaching Research Infant and Child Center Classroom for Moderately and Severely Handicapped Children and Inservice Training in the Teaching Research Data Based Classroom for Severely Handicapped School-Age Children were both developed by Teaching Research, a division of the Oregon State System of Higher Education, Monmouth.)

evidence of effectiveness Using a multiple baseline approach, it was demonstrated that within the Teaching Research Infant and Child Center a mean of 7.9 skills per month was acquired by a child without instruction, while 64.4 skills per month were acquired with instruction. Replication-site children acquired a mean of 9.1 skills without instruction and 90.1 skills with instruction.

implementation requirements The model can be used by an individual classroom. Inservice training of teacher and aide is required.

financial requirements Based on 12 students per class, one teacher, and one aide, operational expenses averaged $2,366 per child in the Teaching Research Classrooms during 1976-77. This figure includes: supervision, $2,000; salaries, $22,471; supplies, $500; transportation, $3,420. Start-up costs average $6,500, including supervision, training, and supplies. Materials used in the classroom are commercially available; information can be obtained from Teaching Research.

services available An NDN-funded Developer/Demonstrator project. An OSE Handicapped Children's Early Education Outreach Program.

This is a nonprofit agency; some support comes from United Way. Materials describing the program, including videotapes and printed material, are available at cost. Training is conducted at the project site. Follow-up is conducted at adopter sites. Project staff can attend out-of-state conferences. Visitors are welcome by appointment.

PROJECT MACOMB 0-3 REGIONAL PROJECT: A Rural Child/Parent Service

descriptors

Aurally Handicapped, Cerebral Palsy, Down Syndrome, Emotionally Disturbed, Language Handicaps, Mainstreaming, Mentally Handicapped, Multiply Handicapped, Orthopedically Handicapped, Preschool Education, Rural Schools, Special Education, Speech Handicapped, Visually Handicapped

target audience

Approved by JDRP for children from birth to age 3 and their parents.

description

A project that provides home-based remedial and educational services to handicapped children and their parents in rural areas.

The program has two main goals: to provide an effective educational and remedial program for the optimal development of handicapped infants and children in rural areas, and to help parents who live in rural areas acquire skills and knowledge that will make them more effective in dealing with their handicapped child. The assumption on which development of the project was based is that parental involvement and cooperation, and enthusiasm and coordination among the persons who work with the child and family are all essential.

The project uses a number of materials and services to attain its goals, including referrals, screening, diagnosis, and assessment; home visits; sharing centers for parents and children; and a simple-to-use core curriculum that provides appropriate developmental goals in cognitive, language, self-help, gross motor, social, and sensory areas. Staff include full-time Child Development Specialists (CDSs), who act as case managers and perform other functions. A CDS works closely with children and parents and is trained to recognize the need for specialists, such as speech therapists and physicians, and to obtain their services. Project staff also work to make the best use of the limited medical and support services available in rural areas. By participating in interagency community councils, providing service to community groups, and working closely with public school personnel, they help to foster cooperation among agencies.

Parents are involved in a variety of ways. During weekly project visits to the homes of project children, the CDS and the parent work as a team with the child. Parents also participate in the planning and conduct of biweekly meetings at sharing centers, which are located in community building or homes and which function much like cooperative nursery schools, providing a transition between home and center-based activities.

evidence of effectiveness

All participants are pre- and posttested using the Alpern-Boll Developmental Profile and the Bzoch-League Test of Receptive and Expressive Emergent Language. Test data indicate that the program has significant development impact. Complete entrance-exit data for 34 children served by the project during an 18-month period are available.

implementation requirements

A single agency or person may replicate the whole model or any component(s) (Home Visits, Sharing Center, Water Activities [WADE]). Adopter participates in initial staff training at project site and follow-up training (as needed) at adopter site; conducts follow-up evaluation two and four months after implementation; completes questionnaires; and supplies information on the number of children and parents involved and on children's handicapping conditions. Staff must have training and/or experience in services for handicapped children. Home Visits component requires an office with ample storage space. Sharing Center requires a large, empty ground-floor room. WADE requires a swimming pool with roped-off shallow end and senior lifesaver.

financial requirements

For 15 children, minimum cost per child is approximately $2,410 for the first year and $2,240 for subsequent years. Costs include personnel, training, travel, equipment, and materials. A curriculum guide for Sharing Centers, a core curriculum, a series of papers on pertinent topics, videotapes, and slide-tapes are available from the project.

services available

An OSE Handicapped Children's Early Education Outreach Program. No other specia network funding supports this project's dissemination efforts.

Single copies of awareness materials are available free to potential adopters (additional copies available at cost). Visitors are welcome at project site by appointment. Training is conducted at project site and adopter site (adopter pays only its own costs). Follow-up services are available free to adopters at project site (adopter pays only its own costs).

PROJECT

MAPPS: Multi-Agency Project for Pre-Schoolers

descriptors

Cerebral Palsy, Down Syndrome, Emotionally Disturbed, Home Instruction, Language Handicaps, Learning Disabilities, Mainstreaming, Mentally Handicapped, Multiply Handicapped, Orthopedically Handicapped, Preschool Education, Rural Schools, Special Education, Speech Handicapped, Visually Handicapped

target audience

Approved by JDRP for handicapped children, birth to age 5.

description

An intervention program for handicapped children and their parents in remote areas.

The Multi-Agency Project for Pre-Schoolers is a home- and community-based intervention program for handicapped children in rural and remote areas, where professionals trained to work with handicapped children are often lacking. The program makes it possible for parents to act as intervention agents for their own handicapped children from birth to age 3 by providing parents with a detailed and specific curriculum, training them in its use, and providing weekly monitoring. For handicapped children ages 3-5, the program makes the use of existing preschool and community day care services practical by providing curriculum materials and training for parents and teachers.

The heart of the program is the Curriculum and Monitoring System (CAMS), which covers five curriculum areas: receptive language, expressive language, motor development, self-help development, and social-emotional development. The system includes five sequenced curriculum programs with detailed teaching instructions appropriate for use by persons of various backgrounds, a manual providing an overview of the CAMS model and explaining the procedures for use of the curriculum programs, tests to determine where each child should be placed in each program, and an introductory slide-tape presentation. Behavioral principles, particularly those related to programmed instruction, were the basis for the design and development of these materials.

evidence of effectiveness

Standardized and criterion-referenced pre- and posttests, including the Bayley Scales of Infant Development, the Peabody Picture Vocabulary Test, the Assessment of Children's Language Comprehension, and the Visual Motor Integration Scale, as well as criterion measures developed by the project, showed significant improvement over a nine-month period.

implementation requirements

Implementers may be a single teacher, a school, a district, or combination of districts. The CAMS materials and training manual for training both parents and teachers must be used. On-site training as well as follow-up technical assistance visits may be nogotiated.

financial requirements

Based upon figures for serving 50 children, costs of the program for personnel, training, equipment and materials, travel, and technical assistance were $75,000 for start-up and $70,000 per year thereafter, with an average cost per student of $1,400 per year.

services available

An OSE Handicapped Children's Early Education Outreach Program. No other special network funding supports this project's dissemination efforts.

Awareness materials are available at no cost. Visitors are welcome at project site or at replication sites around the region. Project staff are available to attend some out-of-state awareness meetings. Training is also available at the adopter site (costs to be negotiated). Follow-up to the adopter is available.

ISIS Instructional Modules

ISIS modules are designed to be used individually, or grouped into clusters of units, or combined to form full-year science courses. Every module includes a standard text, an Annotated Teacher's Edition, and two forms of a test. Most equipment required is available in standard science classrooms. Nonstandard equipment is specified under the appropriate module. Some modules are available from the commercial publisher, Ginn and Company, which can provide additional product and pricing information. Other modules may be reproduced locally at local expense; arrangements and permission for reproduction must be obtained from the project.

Content area code: B=Biology, C=Chemistry, GS=General Sciences, H=Health, P=Physics, PS=Physical Science.
